## 03/05

We decided on using Meteor as our web framework for frontend/backend code.

We also decided on a UX flow for the website.

These are the images we drew as concepts for how the pages will look:

Code: `Placeholder_text`

HTML Canvas

Bracket/tournament page

Delete   Signup: `Placeholder`

name [   ]

Player id [   ]

[Join]

Join-tournament page

Name: [   ]

players: [∨]

[Create]

Create-tournament page
